

Executive Dashboards

Fact Sheet

SYSPRO Executive Dashboards allow businesses access to an interactive visual representation of real-time data. It also provides executives with measurement, monitoring and what-if analysis tools to leverage strategic advantage off their ERP investment.

SYSPRO Executive Dashboards provide a number of predefined dashboards that enable executives to gain an immediate view of their business through a simple select-and-drop mechanism. SYSPRO recognizes that every executive has unique information requirements and therefore additional dashboards can be created through the use of Crystal Dashboard Designer.¹ This allows businesses the flexibility to personalize their dashboards or even build their own custom applications.

¹ Crystal Dashboard Designer is a product which delivers next-generation visual analysis tools that let users of different skill levels in small, mid-size, and enterprise companies transform complex business data into actionable visual information

The Facts

Fact Sheet

The Benefits of Executive Dashboards

- Access to real-time data in the ERP solution without the need to incur the large investment of time, hardware and licensing typically associated with business intelligence solutions
- Provision of a number of predefined dashboards to enable an immediate view on business processes
